protel Address Check

Complete, correct and verify guest addresses

- ✔ Complete
 - ✔ correct
 - ✔ verify
 - ✔ update
- address data automatically

Concentrate on the core operations: protel Address Check saves you time and nerves.

From the moment you create a guest profile, protel Address Check makes sure address data is complete and correct. Addresses received through online bookings, are also verified and if required corrected or completed automatically.

This will guarantee a long-term quality improvement of the entire address data base in your protel hotel management system.

➤ Only little address information is needed when creating a new guest profile

➤ Address data after automatic completion and verification:

Customer loyalty and increased occupancy through direct marketing

Guest retention:
Keep in touch with your guest!

Customer satisfaction and loyalty are of vital importance for effective and guest-oriented hotel management - protel Address Check presents the ideal technological basis to successfully peruse and achieve these goals.

Staying in touch by post is easily possible thanks to correct guest addresses: Whether you'd like to let your guests know how much you value them by sending special offers, invitations to certain events or birthday greetings is up to you.

PROTEL ADDRESS CHECK

protel Documentation | protel Address Check – Product information | EN_1.0 (2011-04-14)

Your advantages at a glance

Entry of data:

➤ Save time by up to 40%

Double your benefits the moment you enter address data: The automatic completion and correction function allows a 40% faster data collection. This speeds up work processes at the front desk and your staff saves time - time they can use to taking good care of the guests.

One solution for all countries:

➤ International address data

The web service Address Doctor provides address data from more than 240 countries and always in accordance with national conventions. This way, you'll always have complete, correct and up-to-date address data of your guests at hand.

It's your choice:

➤ Automatic or manual

protel Address Check allows either manual or fully automatic verification of address data in the background. A combination of both options is also possible.

Online reservations

➤ with correct address data

A particular advantage when guests book online and data is transferred via protel IDS connect interfaces: Information provided by guests who book online, will be verified, completed, corrected and added to a new guest profile without further ado.

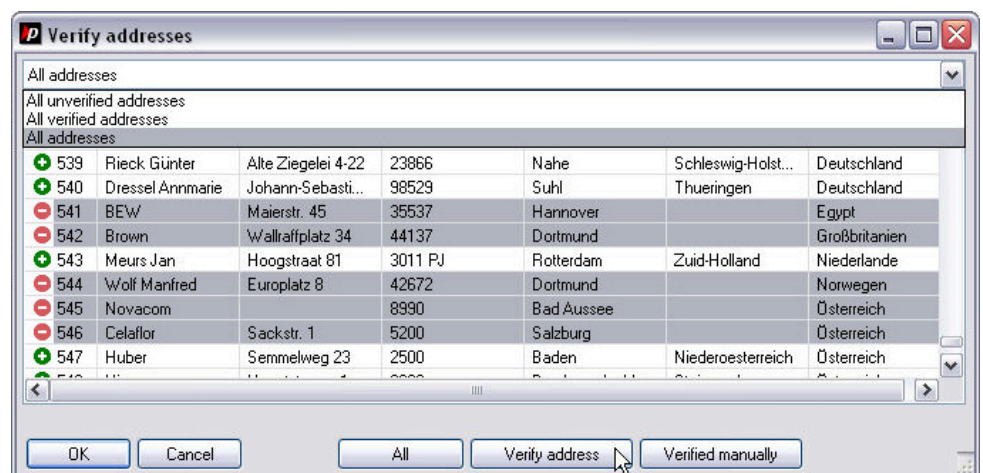

Batch control of your entire address data base

Verification of your entire address data base in your protel PMS is no problem at all.

You can choose whether you'd like all addresses or just part of all existing addresses to be verified and automatically corrected and completed:

Batch control:

1. Make your selection
2. Click on [Verify address]
3. Done!
